

We are looking for a:

## Agent / Distributor

of medical devices (CMF and/or Neuro)

### Is this you?

To realize our ambitious growth plans in the field of patient-specific implants, we are looking for enthusiastic companies, independent sales agents and representatives who are as passionate as we are about using state-of-the-art technology to help surgeons and patients. Preferably you have an existing network of CMF (OMF/MaxFac) and/or Neurosurgeons.

*As a Xilloc agent/distributor you are our personal contact point for surgeons in your country and you will work closely with them to provide personalized implants and surgical guides for their patients. With your help we can assist more surgeons and help more patients. You will be responsible for business development and sales in your country/region and in close contact with (y)our surgeons.*

We offer unique and personalized products that answer to a growing demand for patient-specific solutions. Our products are an excellent addition to an existing portfolio in CMF and/or neurosurgery products and obviously you will receive a decent referral fee.

Please note that due to the nature of our products, our biomedical engineers have to be in direct contact with the surgeon in order to collaborate on the design of the implants (we have developed an interactive online platform to facilitate this).

### About Xilloc:

Xilloc is a company specialised in custom products, for high quality personalized medical applications such as Patient-Specific-Implants, Surgical Guides and Anatomical Models. We are dedicated to maintain Xilloc as the highest standard for Patient Specific Products.

The company uses state-of-the-art design and manufacturing methods, including a wide range of 3D Printing technologies. Xilloc designed and produced both the world's first 3D printed cranial plate as well as the first full 3D printed mandible.
