We are looking for a:

IT System Administrator

Is this you?

You feel at home using Linux and Windows? You love to solve IT problems efficiently? You are self-organized and can work independently in an international team? You are the oil that keeps our IT infrastructure running smoothly? You like to put your effort into our young and growing company to make the world a bit smarter and healthier?

As System Administrator you are responsible to keep our IT infrastructure in a good and healthy condition. You are responsible to keep our server up and running. You will protected us from common IT threats.

We offer a fulltime position in a very innovative and multicultural company, based in the Limburg region in The Netherlands (located at Brightlands Chemelot Campus in Sittard-Geleen) for a driven team-player who doesn't mind going the extra mile.

Essentials:
- SSH
- Active Directory
- IP-Networking / Firewall / Wireless
- VPN
- Max 40 minutes distance from Sittard-Geleen
- English

Preferred Knowledge:
- Puppet / Ansible
- TheForeman
- Docker/ Kubernetes
- KVM Cluster / oVirt
- Understanding Dutch or German
- Scripting/coding skills are a plus

About Xilloc:

Xilloc is a company specialised in custom products, mainly for high quality medical applications. The company uses state-of-the-art design and manufacturing methods, including a wide range of 3D Printing technologies. We designed and produced both the world's first 3D printed cranial plate as well as the first full 3D printed mandible.

Xilloc developed its own online ordering system which is poised become the Amazon.com of custom-made medical devices.
